

Virtual knowledge Centre

Client:

Location: Odisha

Contributes to SDG(s)

ISSUE

Unavailability of a single portal providing access to Knowledge products and domain experts relevant for the profile of potential entrepreneurs without any financial cost.

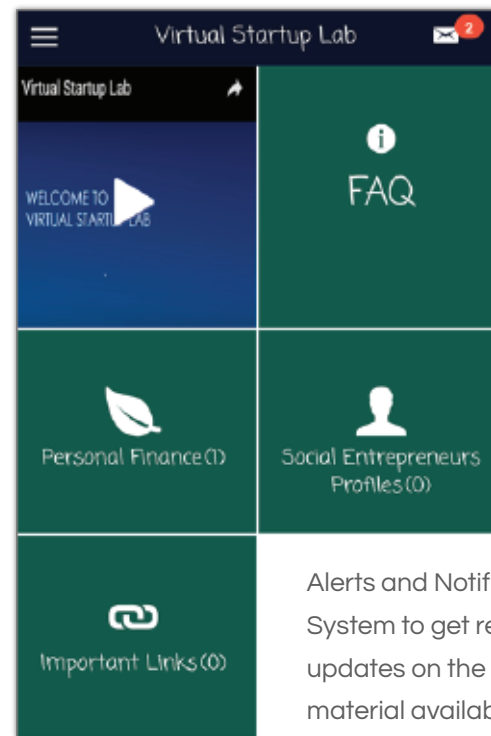

INTERVENTION

Web based Application was developed for managing the content of the Knowledge Portal through domain experts.

Mobile Application was developed for dissemination of knowledge products in form of audio/ Video/ Documents and to reach out to the experts if required.

Alerts and Notification System to get regular updates on the new material available.

OUTCOME

Virtual Knowledge Centre is an effort to make the knowledge and information available to the potential entrepreneurs at the press of a button without any financial cost. VKC is a modest effort to bridge the gap between the knowledge seekers and knowledge providers. The focus remains on providing accessibility of business knowledge to people having existing business and also those who are planning to start their business.
