

Data Dissemination System

Client:

Location: Assam, Bihar, Uttar Pradesh

ISSUE

Government and private stakeholders are running various programmes aimed towards addressing issues related to health, nutrition, education, child survival, development and protection.

Various data sets reported from primary and secondary sources need to be consolidated and used as evidence for effective planning and mid-course correction of these programmes.

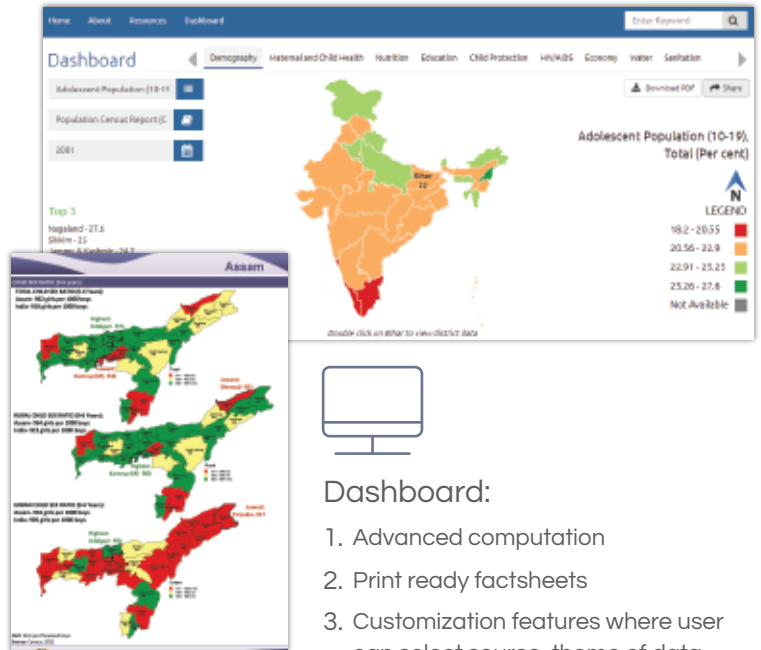

Contributes to SDG(s)

INTERVENTION

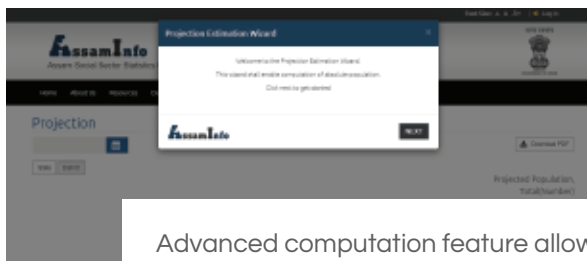

Data consolidated from various primary and secondary sources at one place using DevInfo, an open source technology.

Dashboard:

1. Advanced computation
2. Print ready factsheets
3. Customization features where user can select source, theme of data and geography

Advanced computation feature allow user to project absolute population, estimate burden and compute index for a selected geographical level.

Template based bulk data uploading feature allows user to update the data as per requirement.

OUTREACH
