Location: Jharkhand

Contributes to SDGs:

ISSUE

Paper based monitoring system.

Lack of any mechanism to validate the data or track non-submission

Lack of any central repository on the human resources engaged to ascertain the condition of the MMU vehicles.

INTERVENTION

Use online forms to capture a comprehensive baseline survey for the existing MMUs covering infrastructure, human resource, and consumables. Besides, process and outcome indicators were also captured.

Transform the existing legacy data for the past three years and make it accessible onto a web based DevInfo interface.
