## ISSUE

The quality improvement life cycle was time consuming as the data collection and analysis processes was Excel based.

Lack of proper planning and mechanism to track engagement of the health facilities under Aarogyasri Health Care Trust.

Standardized implementation of quality improvement processes like PDSA (Plan, Do, Study, Act).

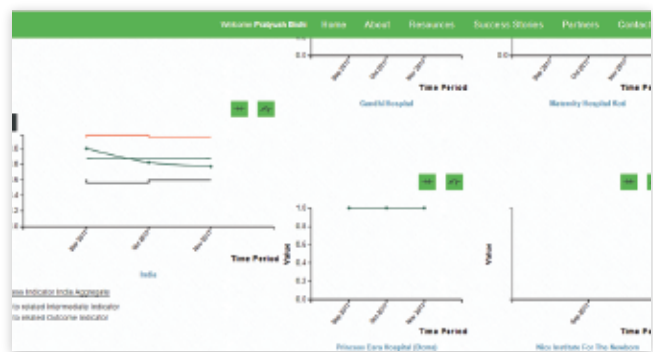

## INTERVENTION

Digitizing checklists for data collection.

Workflow based data collection to address data quality issues.

Web based application for monitoring planning of associates with role-based access to relevant health facilities.

An interactive dashboard visualized using control charts for monitoring the quality improvement process.

A web-based application for digitizing the PDSA (Plan, Do, Study, Act) tool to track the change process.

System generated summary/planning/raw/aggregated report for informed decision making.
