

Odisha Health Scorecard

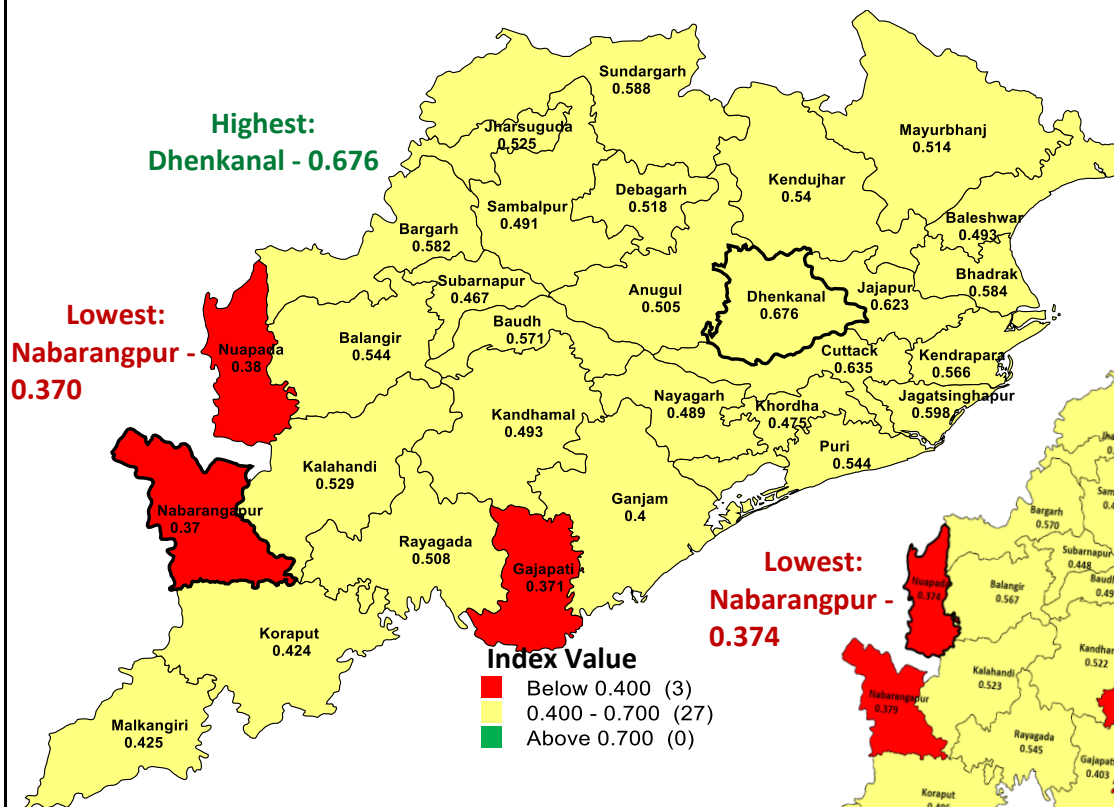

Volume- V, April 2017 - September 2017

Based on HMIS cumulative reporting for the period April 2017- September 2017

COMPOSITE HEALTH INDEX

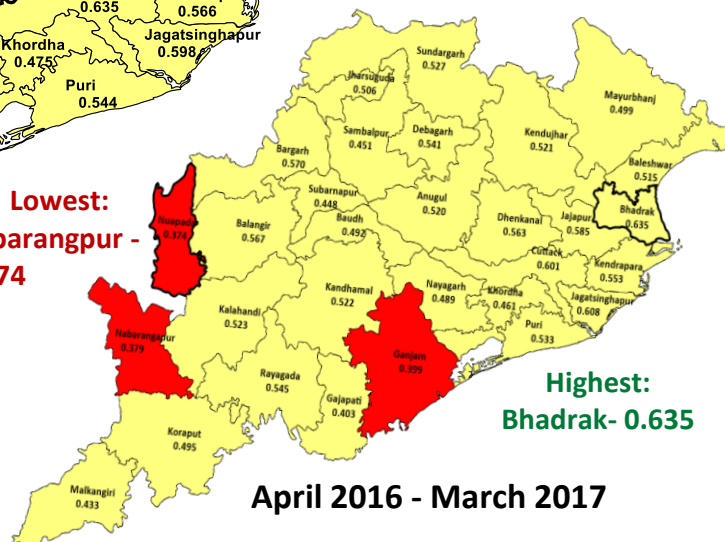

April - September 2017

- While HMIS data over the last six month period shows some positive trend compared to the composite health index for the previous year, none of the districts fall within good performance range of composite health index.

- Nuapada and Nabarangpur continue to be lowest performing districts.

Lowest:
Nabarangpur - 0.374

April 2016 - March 2017

Note: The map is for representational purpose only

Ranking of districts based on Health Index

District	Rank	District	Rank	District	Rank
Nabarangpur	1	Baleswar	11	Puri	21
Gajapati	2	Kandhamal	12	Kendrapara	22
Nuapada	3	Anugul	13	Baudh	23
Ganjam	4	Rayagada	14	Bargarh	24
Koraput	5	Mayurbhanj	15	Bhadrak	25
Malkangiri	6	Deogarh	16	Sundargarh	26
Sonapur	7	Jharsuguda	17	Jagatsinghpur	27
Khordha	8	Kalahandi	18	Jajapur	28
Nayagarh	9	Keonjhar	19	Cuttack	29
Sambalpur	10	Balangir	20	Dhenkanal	30

This scorecard is based on a Composite Health Index computed out of sixteen RMNCHA indicators (tabulated in page 2) used by the 4-staged lifecycle framework of the Ministry of Health and Family Welfare (MoHFW) to assess and improve the service delivery through routine monitoring system. The 4 stages of lifecycle covered are: Pre-pregnancy/reproductive age, Pregnancy care, Child birth / delivery and Post natal, maternal and new born care. Cumulative reporting, as followed in the HMIS reports, has been used for computing index in this scorecard. Consistent colour coding has been maintained in the maps and the tables with indices as well as ranking.

Sonapur	0.520	0.472	0.361	0.495	0.467
Sundargarh	0.629	0.648	0.300	0.674	0.588

Pregnancy care and postnatal care index are reported poor for only one and three districts respectively. Performance of majority districts on child birth care is reported poor (20 districts). Reproductive age health care has been reported poor in 12 districts. Poor performance on these contribute to overall poor composite index. Nabarangpur and Nuapada reported poor performance in three sectors (reproductive age, child birth and postnatal care) contributing to poor composite health index.

SECTOR-WISE COMPOSITION OF INDICATORS

Sectors	Indicators				
Reproductive Age Group	% of Male sterilisation		% PPS (Post Partum Sterilisation)		% IUCD (Intra Uterine Contraceptive Device)
Pregnancy Care	Registration during 1st trimester	Pregnant Women receiving 3rd ANC	Pregant Women receiving 100 IFA tablets	Complicated cases attended for delivery	Pregnant Women receiving TT-2 and booster
Child Birth	Skilled Birth Attendant (SBA) delivery		Institutional delivery against registration		% C Section out of total Institutional Delivery
Postnatal, Maternal & New Born Care	% Women stayed for 48 Hr in institution after delivery	% of New born with birth weight < 2.5 kg	% of Newborn breast feed within 1 hour	% of New born visited within 24 hr (Home Delivery)	% Full Immunisation against BCG

Health Index: Comprises of all the sixteen (16) indicators
